I began my programming journey at the computer science department of Stony Brook University in New York. As a student, I learned to code starting with the fundamentals, including MIPS assembly, and Java. Since leaving university, I have taught myself to develop / style for the web, and am currently employed as a full stack developer using tools, such as Vue and Node. Outside of the office I consistently keep myself busy with new side-projects to improve my development capabilities. Please check out my site atjameslee.com for more info.

PROFESSIONAL EXPERIENCES

Code-Ninja

Full Stack Developer / April 2017 - Current

- Lead front-end development for all (2) projects.
- Ported legacy monolithic-PHP project to Node (Nuxt front-end and Adonis back-end).
- Refactored existing codebase by modularizing code for optimal Webpack bundling.
- Isolated back-end and front-end bottlenecks that ultimately reduced initial SPA loading time from 12 to 2 seconds.
- Presented a number of brown bag sessions on various topics.

Linken-Labs

Full-Stack Developer / January 2015 - February 2016

- Developed three projects: Client-facing web-app, admin-facing web-app, backend API services.
- Front-end designed entirely with Bootstrap and CSS.
- Boosted site's SEO rankings to first page of Google.
- Technologies: Angular1, MySql, C#, .Net, AWS.

EDUCATION

Stony Brook University, New York, USA

B.S. Computer Science, December. 2014

- Double majored in Business Administration, with additional courses in Political Science

PROJECTS

Beauty Quotient / Summer 2018

- Applied the golden ratio to a ML computer vision library to compose a mathematical beauty score.

Tagalong News / Spring 2018

- Philippine's first multilingual aggregated news site built with Serverless and Vue.

Bittionaire / Winter 2017

- Crypto-currency trading strategy simulator using a number of trading indicators.
